

For many organisations, IT is both a vital tool and an ongoing challenge. You need systems that keep people productive, protection from growing cyber threats, and confidence that technology will support long-term goals. Finding the right balance of support, security and strategy is key, but it can be hard to achieve without a trusted partner. With over 30 years' experience delivering IT and cybersecurity managed services, we understand these pressures and know how to help you overcome them.

Introducing • **totalIT** from ramsac

totalIT is a managed IT service, designed to give you flexibility and choice, with three solutions, each building on the last, giving you a clear path from dependable day-to-day support through to advanced protection and strategic guidance. This means you can start with the level of service that's right for you now, and easily scale as your organisation's needs evolve. With totalIT, your IT provision grows in line with your ambitions, supported by our proven expertise in keeping technology reliable, secure and future-ready.

• **totalIT** essentials

totalIT essentials is the perfect foundation for organisations that need reliable, proactive IT support. It covers the basics, ensuring your team stays productive with dependable helpdesk access, patching and reporting.

• **totalIT** secure

totalIT secure is designed for those who take cyber protection seriously. In addition to everyday support, it includes 24/7 monitoring, backups, vulnerability management and regular resilience reporting, giving you peace of mind that your systems are protected.

• **totalIT** premium

totalIT premium offers the highest level of partnership. It combines all the features of secure with strategic consultancy, on-site support, advanced planning and compliance services, providing a truly comprehensive IT management solution.
